

# WIESHEU

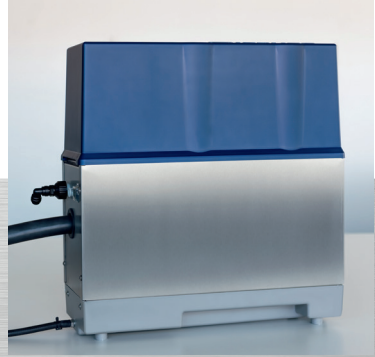

Fully automatic  
cleaning system

## ProClean365

# ProClean365

The first fully automatic cleaning system

The compact cleaning unit is connected to the back of your oven and has been designed so you only need to top up the cleaning agent once a year when carrying out maintenance.

The cleaning starts automatically or manually. Starting the cleaning automatically further increases process safety.

## Completely new standards

- **Always a clean oven – a safeguard of food hygiene**
- **No user interaction at all – this prevents incorrect cleaners / incorrect cleaner volumes**
- **No logistics and administration effort**
- **No effect on the oven's depth when using Steamax XL**
- **Status display in the oven controller and also in the cleaner unit**
- **Creation and central evaluation of a cleaning log**  
(for documentational reasons)

## Technical data / Pre-requisites

- Can be retrofitted for Dibas 64 blue or Euromat 64 with ProClean or LiquidClean
- IS 600 E, Exclusive or Wtouch control unit.
- Topping up cycle: 1 x annually by WIESHEU-Service.
