

# hi, bread

*The system solution for universal in-store baking*

“hi, bread” is the perfect **system solution** to flexibly **partially** or **fully automate** the baking process at the PoS. Thanks to its modular design, “hi, bread” can be adapted to suit your requirements:

- Integrated freezers and/or cold storage facilities
- Automated corner solutions
- Camera system to detect baked goods, incorrect loads, number of items, etc.
- Capacity used optimally

Integrated **AI technology** with automatic self-learning function:

- Ensures optimum availability of goods
- Creates an intelligent sales forecast
- Reduces high levels of waste thanks to optimised inventories at closing time

## KEY POINTS:

- Automated baking process at the PoS
- After manually loading dough pieces, they can be baked as required
- When ready, baked goods are automatically placed on the shelves
- Various levels of automation possible

# „hi, bread“ mini

## Modular partial automation at the POS

Are you looking to start adding some automation to your branch? Then the modular **“hi, bread” mini** is bound to be the right choice. The system is configured according to your requirements and on-site conditions, and both the degree of automation and capacities are customised.

### THE SYSTEM:

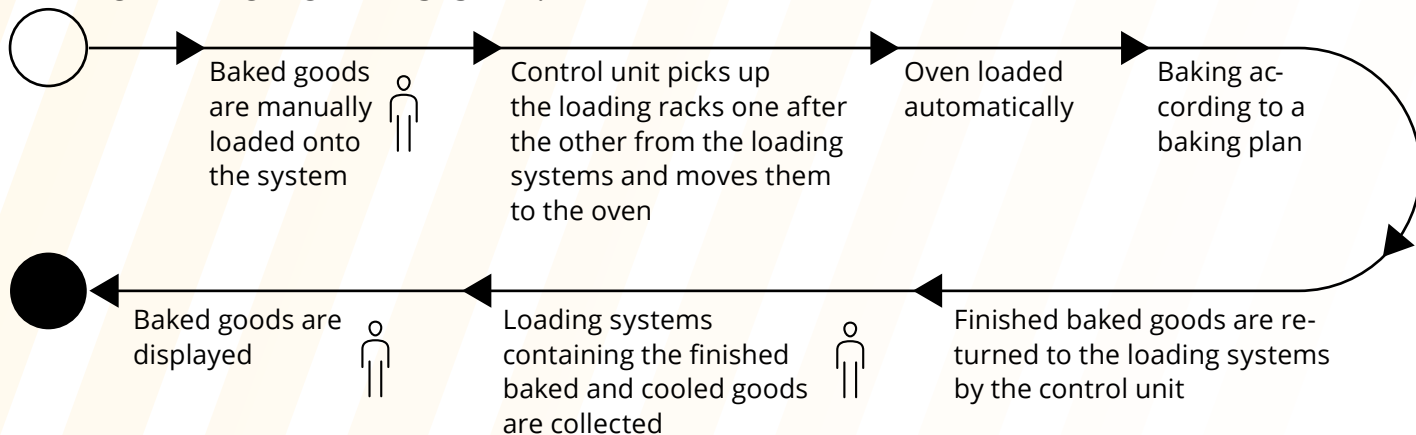

- Loads and unloads the oven automatically
- Stores the goods to cool after baking
- Controls the baking process independently
- Is fully modular

### BENEFITS:

- Significant reduction in staff workload
- Optimised energy savings
- Improved waste reduction
- Uses existing equipment

### OPERATION OF THE SYSTEM:

**WINNOVATION**
