Wnet –  
the WIESHEU  
oven network

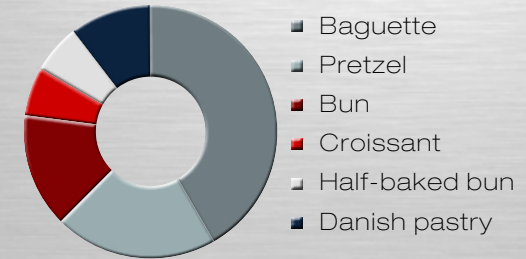

## What is Wnet?

- Wnet is the software solution for the simple management of all baking ovens in your stores.
- Wnet creates transparency in user behaviour and is a maintenance and service tool.
- Wnet can be connected to existing databases and offers saving potential through an optimized data management and the reduction of service calls.
- Due to the possibility to transfer firmware and configurations, all your ovens are up-to-date with the software by one mouse click.

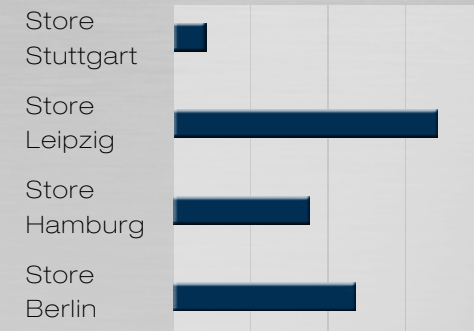

## What can be done with Wnet?

## Which information does Wnet provide?

Number of baked pretzels

**Permanent access to your business data.**  
**You can create evaluations and baking programs**  
**as well as synchronize oven parameters.**

Your questions? [wnet@wiesheu.de](mailto:wnet@wiesheu.de)  
[www.wiesheu.de](http://www.wiesheu.de)

- Which baking program is baked how often?
- At which time is baked in the store?
- What was sold in which store?
